

## Role of the Govt. in Health

Q.1 In this chapter you have read that health is a wider concept than illness. Look at this quote from the Constitution and explain the terms "living standard" and "public health" in your own words.

An important part of the Constitution says it is the "duty of the state to raise the level of Nutrition and the standard of living and to improve Public health."

Ans Living Standard →

(i) Living Standard means the level of living of people at which they live. If they live in hygienic conditions enjoying all the comforts of life, it means their living standard is high.

~~Public~~ Public Health →

it means the general level of Public Health. It ensures that every person has right to get health facilities. The Govt. provides free basic health facilities at low cost.

Q.2. What are the different ways through which the Government can take steps to provide Health care for all? Discuss.

Ans. The Govt. can take steps to provide healthcare for all by —

- Increasing the number of hospitals, Health care centers and<sup>1</sup> welfare centers.

- Organising Free Camps for check up of general Public.
- Spreading health awareness in ~~for~~ people by workshops, seminars and camps.

Q.3. What differences do you find between Private and Public health services in your area? use the following table to compare and contrast these

Ans.

Facility	Cost of services	Availability of service
Private	High, Very expensive	Everything is Available but on high cost
Public	Either free or at Very low cost	There is always rush at the public hospitals. Even though services are available there but it takes time

Q.4. "Improvement in water and Sanitation can control many diseases". Explain with the help of examples.

Ans. Water and Sanitation are the basic necessities for the maintenance of our health. Poor quality of water causes a lot of health problems. Similarly poor sanitation causes many epidemics giving birth to dangerous insects and worms.

Recently we saw the spread of Dengue caused by a mosquito, Malaria, Cholera, Jaundice etc. Improvement in water and Sanitation can control these ~~with~~ happenings.
